

**JOB DESCRIPTION**

<b>Job Title:</b>	Graduate Engineer	<b>Reporting To:</b>	Technical Director
<b>Location:</b>	Belfast or Monaghan	<b>Date Posted:</b>	February 2018
<b>Job Summary:</b>	The post of <b>Graduate Engineer</b> is an excellent opportunity for an ambitious, motivated and professional individual. The post holder can expect to work on a variety of significant and challenging projects to support the development of their technical and leadership skills.		

**Job Detail:**

The post of Graduate Engineer shall suit a motivated and professional individual who has the ambition to gain Chartered Engineer status and work within a progressive and innovative Company. The post holder can expect to work on a variety of significant and challenging projects across a range of sectors. Semple & McKillop’s portfolio shall ensure s/he continue to be provided with a wealth of opportunities to support technical and leadership skills and competency development.

During a structured induction period, the successful post holder shall work under the guidance of an assigned Senior Engineer to develop fundamental skills across all sectors of building services engineering. This experience shall cover all project aspects from inception to handover, including client meetings, design team co-ordination, detailed design, the tendering process and site inspection. It is expected that the post holder shall quickly develop their competencies and work independently on projects of an increasing scale. The key skills of project management, innovative design and building information modelling will be developed on a continual basis as the Engineer takes ownership of their own portfolio of projects and clients.

The Company has a track record of participation in research and development projects with local universities and institutions as well as international partners. The post holder shall work alongside Senior Staff to identify new opportunities and establish in-house research projects which will continue to improve the service we deliver to our clients and our position at the leading edge of innovative design.

As a Company dedicated to nurturing young talent, there shall also be opportunities to work with local education institutions and be actively involved with STEM and other engineering initiatives.

During your first 2 years, you will receive a range of professional and on-the-job training covering technical skills development, interpersonal, communication and leadership development. Following these 2 years, you will continue to receive structured training and guidance, with the potential to be mentored through to achieving Chartered status or gaining a Masters Degree.

The post holder shall have an outgoing personality and a good work ethic coupled with a flexible ‘can do’ attitude.
